PROFESSIONAL STATEMENT

I have always had my greatest proficiency and passion for visual arts: through early education as an illustrator, then professionally as a graphic designer, through to now in video production.

In addition to a broad array of technical skills, both practical and on computer, I have also started, owned and operated several small businesses and worked within customer service/support jobs for many years. This has provided me an excellent foundation for dealing with clients, crew and customers plus solving problems, keeping people happy, consideration and co-operation.

I believe that a hospitable attitude transcends from simply a job requirement to something that customers can see is truly coming from a deeper place of personal caring. My aim is to provide truly unique, memorable and lasting experiences.
